

Description:

REF VE97 Evia

Architecture, light and exclusivity in Santa Cristina d`Aro

In the Golf of Santa Cristina d`Aro, within a new high-end development, Evia is born: a contemporary residence designed for those seeking something more than a house on the Costa Brava.

A completely flat plot of 1,009 m² will host 307 m² of pure lines, natural stone, large windows and a low-maintenance garden with a private pool.

Design, calm and technology merge in a turnkey project where every detail can be adapted to the lifestyle of its future owner.

Efficient, self-sufficient, silent: Evia will achieve an A+ energy rating, with a Huawei photovoltaic system, Daikin aerothermal heating and minimalist window frames.

Just 10 minutes from the sea, with direct connection to Girona and Barcelona, and 20 minutes from the course where the 2031 Ryder Cup will take place, Evia stands out as a unique investment in a strategic location.

Behind the project stands a developer with a solid track record on the Costa Brava, known for excellence in design and construction quality.

For interested buyers, a completed showroom house built by the same developer is available, where it is possible to see, touch and experience the quality, finishes and comfort that will define this new creation.

More than a house: a concept of life, a creation in perfect balance between nature, design and technology.
